ZhongAn Introduction

ZhongAn Online P&C Insurance Co., Ltd., the first Internet Insurance company in China, was founded on Nov 6th 2013. With no branch organization, ZhongAn provides the underwriting and claims services entirely online.

As the first financial organization with its core system deployed on the cloud platform in China, ZhongAn focuses on the technological innovation. By December 2017, 54.5% of total employees are engineers and technicians. ZhongAn applies advanced technologies such as big data, cloud computing, artificial intelligence, and Internet of Things to reform the value chain of the insurance industry.

ZhongAn has connected more than 300 Internet eco partners to provide them with customized and intelligent solutions to risk management. And ZhongAn is devoted to serving the new generations through science and technology, centering around life consumption, consumer finance, health, automobiles, and air travel. In 2017, we served 432 million customers and on average every person held 12.6 policies.

In November 2016, ZhongAn announced the establishment of ZhongAn Technology, a wholly-owned subsidiary, which is dedicated to exporting its own technology, promoting the upgrading of the informatization in the insurance industry, and becoming an incubator for internal and external innovations. Now it has five product series: S-Series Insurance Products, X-Series Data Intelligence Products, T-Series Blockchain Products, F-Series Financial Products, and H-Series Health and Medical Products.

On September 28, 2017, ZhongAn was listed on the main board of Hong Kong Stock Exchange. The stock symbol is ZhongAn Online with stock code 6060.

With the mission of "Make Your Life in Finance Warmer" and the value of "simplicity, rapidness, breakthrough, and win-win", ZhongAn has ranked among the top five global FinTech companies selected by KPMG for three consecutive years. In the future, ZhongAn will continue moving forward and making achievements.

First ZhongAn Hackathon Competition Introduction

Competition Introduction

The first ZhongAn Hackathon Competition, hosted by Zhong An Online Property Insurance Co., Ltd, has two tracks: blockchain and artificial intelligence. The competition is held to provide a platform for college programming enthusiasts to cooperate and exchange ideas.

The competition is divided into four sections: registration, qualification review, live programming, and awards. On August 24th, ZhongAn will invite qualified college students to attend the two-day programming event at the office building in Shanghai.

The top three teams of each track will be awarded honorary trophies and bonuses to encourage the college students with outstanding creativity and programming skills.

Registration Requirement

1. Participants must be undergraduate, master, or PhD students.

2. At the registration stage, each team should be composed of 3 to 5 people, and should submit an application form. The participating teams need to ensure that the registration information is true and valid.

3. Before August 7, the staff of ZhongAn will contact the team leader who passed the qualification review to arrange follow-ups.

Assessment

Top five teams will be selected for the final oral defense with judges. For each track, 3 teams will be chosen as winners.

Awards

The first place: ¥30,000

The second place: ¥10,000

The third place: ¥5,000

Note: The participants who passed the qualification review will receive a Cherry mechanical keyboard worth ¥500.
